FROM: David M. Wham, Reclamation Hydrologist 

RE: Telephone Conversation with Bill Moeller, American Consolidated Mining Company, M/045/019, Tooele County, Utah

I spoke with Mr. Moeller on February 10, 1988, concerning the permitting requirements outlined in my December 1, 1987 letter. Mr. Moeller indicated that ACMC had never received such a letter, and was therefore unaware of any submittal deadline the letter may have contained.

Because the deadlines outlined in the December 1 letter have already expired, I told Mr. Moeller that I would modify the submittal deadlines and send him the updated letter by certified mail (return receipt requested) within a few days.

I stressed the importance of ACMC obtaining an approved mining and reclamation plan for the Yellow Hammer pit within the new deadlines, and restated our willingness to provide assistance.
